NUMERACY

Calculator Allowed

FIRST NAME _____

LAST NAME _____

CLASS _____

SESSION 1

0:40

Time available for students to complete the Numeracy Test: 40 minutes

Use 2B or HB pencil **only**.

* This is not an officially endorsed publication of the NAPLAN program and is produced by Pascal Press independently of Australian governments.

YEAR 6 NUMERACY

Calculator Allowed

- 1** A marathon started at 9:30 am.
The winner completed the race in 2 hours 12 minutes.
What time did the winner finish the race?

11:12 am

11:42 am

12:12 pm

12:42 pm

Fill in
one
circle.

2 $\frac{4 + 8}{2} = \boxed{?}$

What is the missing number?

3

6

8

10

- 3** Phil has \$2.70 in coins.
What is the least number of coins he has?

1

2

3

4

- 4** Martin is driving from his home in Jackson to his sister's house in Melville.
He has travelled 32 km which is one-quarter of his trip.
How much further does he need to travel to Melville?

km

Write your answer
in the box.

- 5** Four farmers bought a total of 2632 sheep together.
The farmers share the sheep equally.
How many sheep will each farmer have?

452

468

658

678

YEAR 6 NUMERACY

Calculator Allowed

- 6 At the school fete, the jumping castle costs \$2.50, the merry-go-round costs \$2.40 and the train ride costs \$3.20.

Fill in
one
circle.

What is the total cost for 3 children to go on the merry-go-round?

\$7.20

\$7.50

\$8.10

\$9.60

- 7 Which of these has one square face and four triangular faces?

cube

pentagon

square prism

square pyramid

- 8 Klein wrote numbers on six cards and placed them on a table.

431

189

601

263

499

532

What is the difference between the largest and the smallest number?

242

101

412

385

- 9 What is the number 10 more than 10 million?

20000

20000000

10010000

10000010

- 10 Tia wrote a number pattern using the rule:

starting with 3.6, decrease by
0.03.

What is her pattern?

- 3.6, 2.6, 1.6, ...
- 3.6, 3.57, 3.54, ...
- 3.6, 3.3, 3, ...
- 3.6, 3.603, 3.60303, ...

YEAR 6 NUMERACY

Calculator Allowed

- 11** A pie and a bottle of water cost \$5.
Two pies and a bottle of water cost \$8.
What is the price of a bottle of water?

\$

Write your answer
in the box.

- 12** Which number sentence is used to find the average of 4, 2 and 9?

- $4 + 2 + 9$
 $(4 + 2 + 9) \div 3$
 $4 + 2 + 9 \div 3$
 $(4 \times 2 \times 9) \div 3$

- 13** The numbers of different coloured jelly beans in a packet were counted and the results recorded in the table.

Colour	Number of jelly beans
red	5
yellow	4
green	3
blue	5
orange	3
Total	20

What percentage of jelly beans in the packet is red?

%

Write your answer
in the box.

14

What is the value of the missing angle?

- 10° 40° 50° 60°

YEAR 6 NUMERACY

Calculator Allowed

- 15** At a school sports carnival there are 577 students.
If 362 are boys, how many girls are at the carnival?

178

182

215

282

- 16** James turns these cards over and mixes them up.

He chooses one of the cards without looking.

What is the chance of selecting a 5?

1 out of 5

1 out of 8

1 out of 4

1 out of 2

- 17** The price of oil is \$1.40 per litre.
What is the price of $1\frac{1}{2}$ litres of oil?

\$2.00

\$2.10

\$2.80

\$2.90

- 18** In his herd of dairy cows, Terry has four times as many Friesian cows as Jersey cows.

Altogether he has 100 cows.

How many Jersey cows are there in the herd?

400

20

60

80

YEAR 6 NUMERACY

Calculator Allowed

19 The rectangular prism has a volume of 60 cm^3 .

What is the height of the prism?

2 cm

2.5 cm

3 cm

6 cm

20 The grid shows the homes of Peter, Leonard, Terry and Kramer.

Peter leaves his home and jogs 3 km north and then 4 km east to Leonard's home. This trip can be written as 3N, 4E.

If Terry left his home and walked to Kramer's home, which of these could be his trip?

2S, 5W

2S, 5E

2N, 5W

2N, 5E

21 A map is drawn to a scale of 1 cm equals 40 km.

If two towns are $2\frac{1}{2}$ cm apart on the map, what is the actual distance between them?

10 km

60 km

82 km

100 km

22 Which fraction is in the middle of one-quarter and one-half?

one-third

one-fifth

three-eighths

one-sixth

YEAR 6 NUMERACY

23 If $\frac{2}{3}$ of a number is 24, what is the number?

8

12

16

36

Fill in
one
circle.

24 A large group of students were surveyed to find the number who had flown in an aeroplane. A third of the students had not flown.

	Boys	Girls
Flown in aeroplane	33	?
Not flown in aeroplane	28	12

How many girls had flown in an aeroplane?

Write your answer
in the box.

25 A car travels at a speed of 60 km/h for a distance of 210 km.

If the car left at 11:00 am, what time did it arrive at its destination?

12:30 pm

2:00 pm

2:10 pm

2:30 pm

26 Mitchell was born on 6 October 1989.

His sister Laura was born on 6 October 1992.

Which equation shows how Laura's age relates to Mitchell's age?

Laura's age = Mitchell's age + 3

Laura's age = Mitchell's age - 3

Laura's age = Mitchell's age \times 3

Laura's age = Mitchell's age \div 3

YEAR 6 NUMERACY

Calculator Allowed

27 Lionel plants lettuce seedlings in his garden.

He knows that 25% of the seedlings will be eaten by snails in the first week.

If he wants to have 15 fully grown plants, how many seedlings must he plant?

16

19

20

24

28 On the swimming carnival day there were 476 students at school.

The students were transported to the pool on buses.

Each bus can hold 46 students.

How many buses were used?

buses

29 Klein shades $\frac{3}{5}$ of the rectangle.

What percentage of the rectangle is not shaded?

20%

25%

35%

40%

30 A container is filled with balls.

Half the balls are blue, $\frac{1}{5}$ are green and the remainder red.

What fraction of the balls in the container is red in colour?

$\frac{3}{10}$

$\frac{1}{3}$

$\frac{1}{4}$

$\frac{3}{5}$
